Future Scope

Tracking

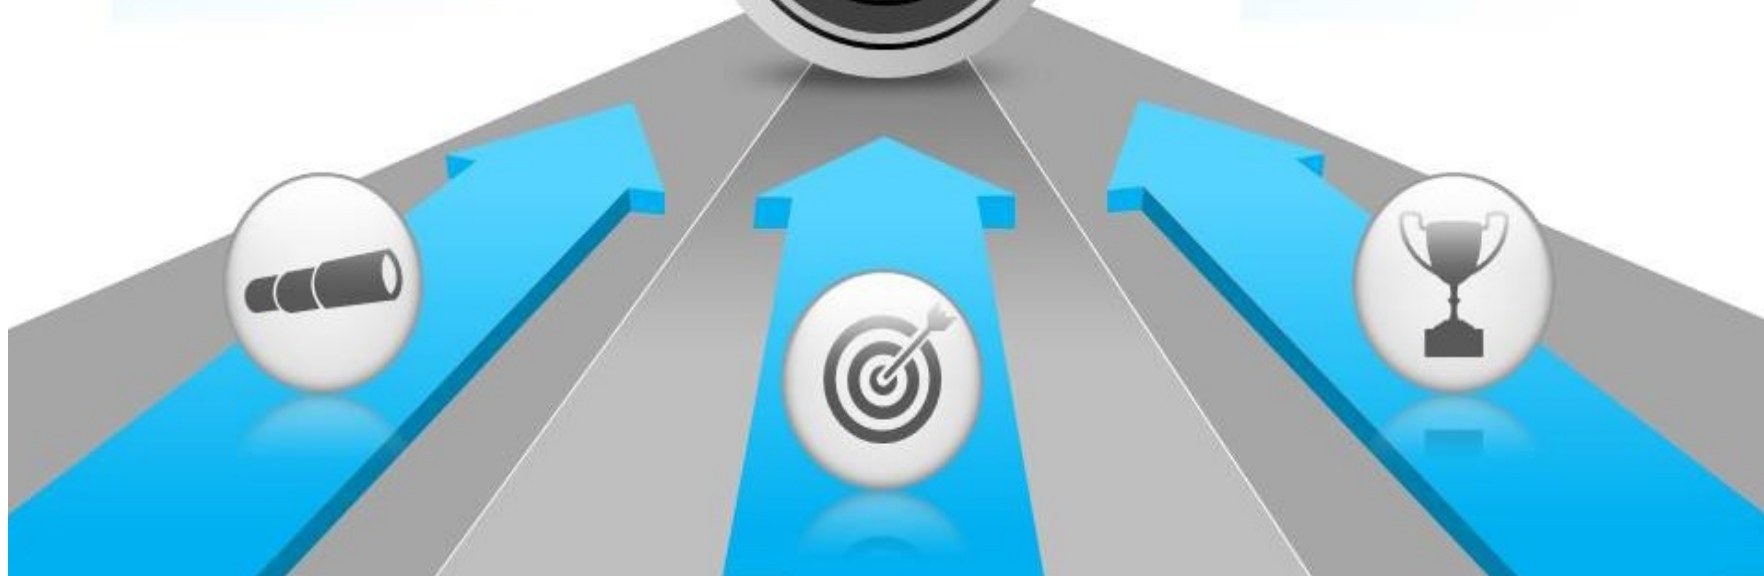

Long route vehicles can be tracked with qr code on toll booths

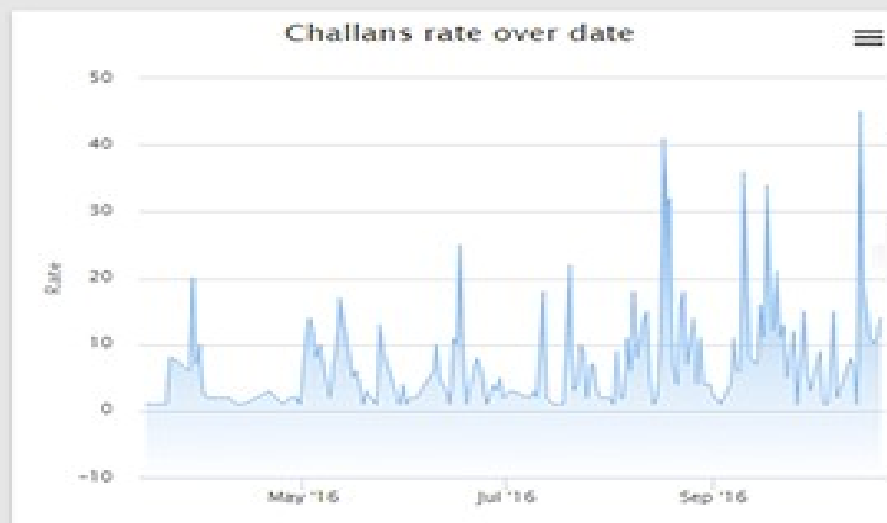

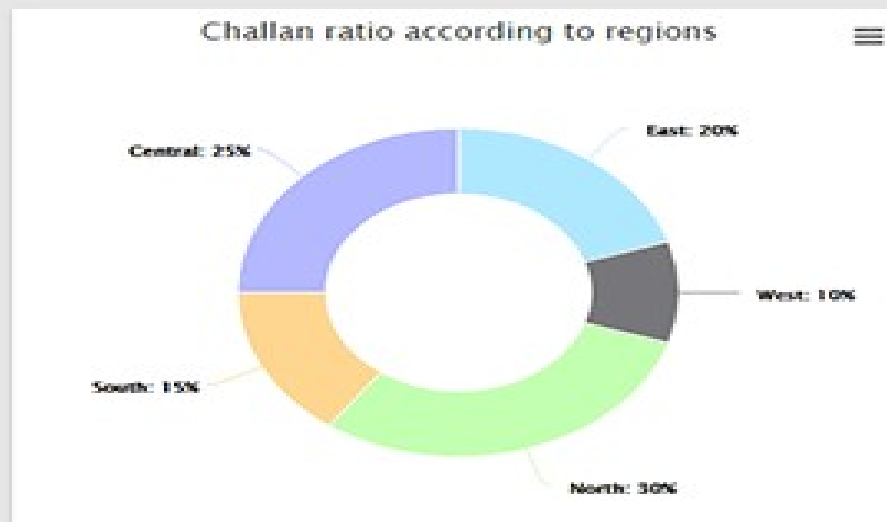

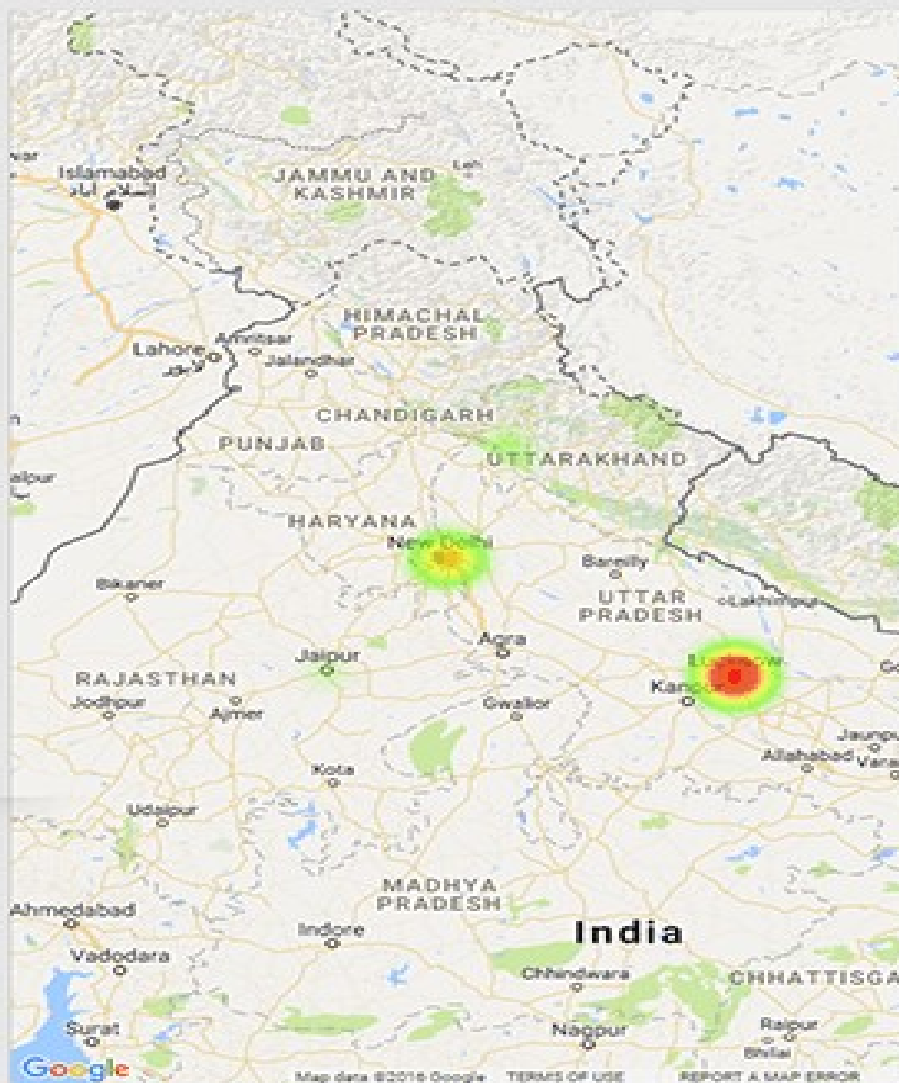

Anti theft

on registering FIR Official can block the QR code of user and if found anywhere that vehicle will be recognized

Alert Mechanism

notifications will be sent to the users whenever a pollution ,insurance is expired

Challan ratio: $\text{No. of challans for which payment is made to government} / \text{Total no. of challans}$

The Revenue Generation Model

All Money to Government Accounts

- Proper Database is made
- Instant challan is recorded once done which cant be altered
- as this app reduces bribism so no corrupt official can make money

Paid Services

- in case a user needs more storage for storing data he has to pay some charges. i.e. some services can be made paid

ADS/Sponsorships

- Due to security issues revenues maybe less beacuse we cant just upload an ad on any page but revenue can be generated upto some instant.
