Meeting Notice

Subject: "Consultancy Services for Preparation of Detailed Project Report and providing Pre-Construction activities for the Construction of a Road Tunnel and its approaches Enabling All Weather Connectivity along the Mughal Road in the State of Jammu and Kashmir"- **Meeting regarding alternate mode of Geological investigation and Tunnel Construction -reg.**

National Highways & Infrastructure Development Corporation Limited (NHIDCL) is taking up development of highways in North/ North-eastern regions and border areas of the country. Due to mountainous and steep terrain, various tunnel projects are also to come up.

For preparation of DPR of the project at above cited subject, possibility of certain alternative methods as mentioned below, are being explored, which may result into better understanding of geological strata and optimal cost estimation and expeditious construction of tunnels:

- (i) Conventional method of Borehole investigation.
- (ii) Alternative mode of Geological Investigation over traditional method of investigation so as to mitigate the uncertainty regarding the actual underground geology.
- (iii) An option to undertake horizontal bore drilling along the alignment to assess the geology.

For detailed discussion of the subject, a meeting is being organised with construction agencies, consultants, experts in the geotechnical explorations and tunnel works, Geological Survey of India, National Highways Builders Foundation, etc as scheduled below:
