The Multi Model transit route as stated is also branching from Km 473.30 of NH-54, which is going to serve the International trade road between India & Myanmar. And a number of villages which are located in the area adjoining to this road are also heavily depending on this road for their social and economic development.

The Road construction will be executed to a double lane standard road having a Right of Way Width of 24m or varying with cutting toe Line. Hence the report is prepared and submitted for favour of according Administrative approval from competent authority.

As free land is not available the Ministry needs to acquire from Land Owner to make the road to two lane standard having a formation width of 12m as per Hill Road Manual IRC: SP - 48 - 1998.

1.5 UTILITY SHIFTING:-

Low-tension overhead electrical lines, Telephone lines, Cable lines & Water supply pipe lines are running along the highway and cross the highway at certain locations. While widening the road to two lanes, the utility lines located on the new carriageway or widening portion would need shifting. At intersections of the cross-roads and locations of traffic facilities, there may be a need for relocation of a few electric, cables, telephone poles & water supply pipe line during execution stage.
