# Utilities From Customer's Point Of View

- Benefited by getting information about Nearest Railway Station's address and location, and also about the facilities available at that particular station.
- Users can earn credit points by sharing the link of the app in various social media such as whatsapp, facebook, hike etc.
- A section will be present in the app where the common mass(registered) can upload information, and for every upload of authenticate information will also fetch points for them.
- These points earned by the users can be invested by getting some gift vouchers from various shopping sites such as Amazon, ShopClues or by getting some discounts on hotel bookings or Holiday trips.

# Utilities From Ministry Point Of View

- Revenue from the Internet Service Providers in the form of taxes on downloading of the app by the users and also uploading the information about the facilities available, at the same time revenue can be generated from the **advertisements** that will be posted on the activity of our app.
- It will help the Government to empower digital literacy and digitization among common mass by creating interest among people by awarding them points.
- So, overall each and everyone present within this chain will be benefitted some way or the other.
- Government can also promote various awareness campaign adds such as Swachh Bharat Abhiyan through this app along with other commercial advertisements.

# Pictorial Representation of the Prototype

## Conclusion

Nearest Railway Station App  
is for the people, by the  
people, of the people  
For making  
*“New India”*
